EDUCATION

M.Sc. Statistics and Machine Learning,
Linköping University
Sweden · 2020-2022

Built an ML pipeline for colorectal cancer metastasis prediction from high-dimensional RNA sequencing data (~64,000 features, under 50 samples).

Applied autoencoders for feature compression and representation learning.

Used PCA for dimensionality reduction and feature selection.

Performed gene set enrichment analysis and statistical modelling to identify biologically relevant patterns.

B.Tech Computer Science & Engineering,
SRM University
India · 2016-2020

SKILLS

Programming & DataPython · SQLBackend & SystemsFastAPI · Redis (caching, queues) · PostgreSQL · REST APIs · async pipelines · WebSockets · SSE streamingAI / ML SystemsLLM APIs · RAG pipelines · embeddings · prompt design · multi-model routing · multi-agent orchestration · memory systemsInfra & DeploymentDocker · Fly.io · AWS (basics) · logging · observability · performance optimizationDataETL pipelines · Power BI · Tableau · data validation · pipeline optimization

Profile Experience

KEY ACHIEVEMENTS

- Built Emote from zero to 450+ users with 40+ power users, achieving 13-15% weekly retention with zero paid acquisition. (<https://emotenow.app/>)
- Led enterprise data platform migration (Azure to PostgreSQL) at Akkodis for Ericsson; recognized for improving reporting reliability and delivery.
